EDUCATION

Degree	Institute	Year	CGPA
B.S in Applied AI & Data Science	IIT Jodhpur	2025 – Present	9.75 / 10
Experiential Learning	LeapStart School of Technology	2025 – Present	—

WORK EXPERIENCE

Library Management System — Full-Stack Developer Trainee [LeapStart] May 2026 – Present

- **Tech stack:** React, PHP, PostgreSQL, Tailwind CSS, REST APIs
- Architected and built a full-stack Library Management System handling book inventory, user management, issue/return workflows, and admin dashboard with **role-based access control (RBAC)**.
- Designed a **normalised relational schema** in PostgreSQL with 7+ tables, foreign key constraints, and indexed queries delivering **<50 ms response times**.
- Engineered **RESTful API endpoints** in PHP consumed by React frontend, enforcing separation of concerns and MVC discipline.
- Delivered a **responsive frontend interface** with Tailwind CSS; implemented real-time search, pagination, and RBAC.
- Followed full SDLC: requirements analysis → ERD → sprint-based delivery → code review → deployment — first end-to-end engineering ownership on a live client deployment.

Freelance Data Analyst [Fiverr] May 2024 – Jun 2024

- Cleaned, restructured, and standardised **10+ client datasets** using Excel and Google Sheets — removing duplicates, resolving inconsistencies, and applying consistent formatting.
- Delivered analysis-ready datasets that directly fed into client reporting pipelines; maintained **5-star rating** across all engagements.
- Applied data quality best practices: null handling, schema validation, and column standardisation to reduce downstream errors.

PROJECTS

LeapStart LMS — Antigravity [Next.js · Node.js · PostgreSQL · Socket.IO · Redis · AWS] May 2026 – Present

- Core contributor to a real-time educational platform integrating chat, assessments, attendance, scheduling, and gamification into a unified interface.
- Designed and implemented a **PostgreSQL schema** with 30+ relational tables covering users, roles, courses, attendance, tests, notifications, and leaderboards using UUIDs, foreign key constraints, and soft deletes.
- Developed **real-time communication features** using Socket.IO and Redis including threaded messaging, mentions, file sharing, syntax highlighted code blocks, and presence indicators.
- Built an **attendance and proctoring system** using AWS Rekognition, geolocation validation, fullscreen monitoring, event logging, and privacy-focused image handling workflows.
- Contributed to scalable backend architecture using Fastify, BullMQ worker queues, PgBouncer connection pooling, and MeiliSearch for full text search.

PlayHub — Sports Facility Booking Platform [Web App · Chatbot · Scheduling] [GitHub](#) | [Live](#) 2025

- Designed and prototyped a **chatbot-assisted sports facility booking platform** — slot scheduling logic, real-time availability checks, and a frontend interface handling concurrent booking conflicts.
- Demonstrated **product thinking beyond code**: built user journey flows, conflict-resolution UX, and capacity management — structured using SDLC principles from requirements through prototype delivery.

Lexis — AI Note-Taking & Summarisation Tool [LLM-Assisted · Python · NLP] [GitHub](#) | [Live](#) 2025

- Built an **AI-enhanced academic productivity tool** — integrating LLM-assisted summarisation pipelines to auto-organise lecture notes, extract key concepts, and generate structured study materials.
- Directly aligned with EdTech product philosophy: solved real student pain points — information overload, unstructured notes, poor recall — through AI workflow automation.
- Explored **Hugging Face model integration and prompt engineering patterns** to fine-tune summarisation quality per academic domain (engineering, sciences, humanities).

Blood Bank Application [SDLC Prototype · FRD · Data-Flow Modelling] [GitHub](#) | [Live](#) 2025

- Executed **full requirement analysis, Functional Requirements Document (FRD) preparation, and data-flow modelling** — demonstrating structured software engineering discipline before writing a single line of code.

- Mapped end-to-end donor-to-recipient blood request workflows; produced entity-relationship diagrams and system-context DFDs used for implementation planning.

POSITIONS OF RESPONSIBILITY

Gemini Student Ambassador *[Google]*

2026 – Present

- Competitively **selected by Google** to represent the Gemini AI ecosystem — engaging with AI initiatives, developer events, and emerging tech communities.

Member — Google Student Developer Group (GDG) *[Hyderabad]*

2026 – Present

- Active participant in technical workshops, hackathons, and developer-focused community sessions.

ACHIEVEMENTS / EXTRA-CURRICULAR ACTIVITIES

- Represented school in **inter-school cricket competitions** in Hyderabad and was part of a **runner-up cricket team** during schooling.
- Part of a **tug-of-war championship team** during primary schooling, demonstrating teamwork and competitive spirit from an early stage.
- Currently undergoing **badminton training** and actively participating in **weekend sports activities** to maintain discipline, teamwork, and physical well-being.
- Secured multiple **Olympiad achievements and state-level ranks** during schooling across academic and competitive examinations.
- Maintained **720+ GitHub commits** while actively building projects and exploring open-source contribution opportunities.
- Secured **9.75 / 10 CGPA** in Semester 1 at IIT Jodhpur.
- Qualified to **Round 3 — Google BigCode Challenge** — ranked in the **Top 1,500 participants across India**.
- Explored **50+ AI and developer tools** through Product Hunt and Hugging Face — actively tracking emerging technologies and AI ecosystems.

TECHNICAL SKILLS

Languages: Python, JavaScript, PHP, SQL

Frontend: React, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend & Databases: Node.js (learning), PHP, PostgreSQL, MySQL

Machine Learning & AI: scikit-learn, pandas, NumPy, Matplotlib, Seaborn, Plotly, Hugging Face, LLM workflows, Prompt Engineering

Cloud & DevOps: Docker, Shell Scripting, Git, GitHub, CI/CD

Data & Visualisation: Tableau, Power BI, Matplotlib, Seaborn, Plotly

Tools & Platforms: Linux, Postman, VS Code, XAMPP

Languages Spoken: English (Fluent), Telugu (Native), Hindi (Fluent), German (Basic)
